

LOADING FACILITY FOR SMALL PRINTER MEDIA

Abstract

A printer having a media tray with a media support surface and a media edge
5 registration surface. A removable media holder has a lower portion contacting the media
support surface, and defines a media receptacle above the lower portion, and having a lateral
opening facing the registration surface. The media tray may be sized for conventional letter
sized media, and the holder may contain smaller media and be entirely contained in the tray.
The holder may be used by removing media from the tray and inserting the holder with
10 small media included.
